

## **CAREERS IN STEM SEMINARS**

**Live Oak, 1127**

**Friday, Oct 11, 2013**

**5:00-6:00 pm**

**Refreshments 4:40**

***Dr. Makan Mohageg***  
***Principal Physics Engineer, Raytheon***

**Optical Science and Industry**

**A Review of Current Trends in Optics, and a Look Back at  
its History**

The \$15B optics and photonics industry has been in a state of constant change for the past 30 years. The ability to proactively recognize forthcoming opportunities is a requirement to succeed in the field. The motivated practitioner will find numerous opportunities in scientific research as well as technology development. Emerging areas of opportunity will be reviewed, with a discussion on how to transition from a CSUN degree to a career in optics.
